

Electrohms - EV Application

Voltage transducer VHASM1K0T01-CB11

Electrohms - EV specific Product, VHASM1K0T01-CB11 is specifically designed to be used in EV Fast Charger application, with high accuracy, good isolation and better price, this product comes with 5 year warranty.

Features of the Product

- Voltage sensor for measurement of electronic voltage signals.
- AC, DC, pulsed for use in electronic equipment.
- Closed loop type Optical based , voltage sensors with high accuracy.
- Fast response < 100us & Isolation up to 4.5KV
